This diagram illustrates the assembly of a LEGO Technic mechanism. The components shown include a grey motor, a grey 1x10 Technic beam, a blue 1x10 Technic beam, a black 1x10 Technic beam, a black gear, and various connectors. Red arrows indicate the assembly sequence: the motor is connected to the grey beam via two black connectors and a grey axle. The grey beam is then connected to the blue beam using two blue connectors. The blue beam is connected to the black beam via a grey connector and a black gear. The black beam is then connected to the black gear via a grey connector. The black gear is connected to the black beam via a grey connector. The black beam is then connected to the black gear via a grey connector. The black gear is connected to the black beam via a grey connector. The black beam is then connected to the black gear via a grey connector.
